PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive web applications, SaaS platforms, and AI-integrated tools using the MERN stack and React. Skilled in translating UI/UX designs into production-ready interfaces, automating workflows, and collaborating across teams to ship functional proof-of-concept and production solutions.

EDUCATION

B.Tech in Information Technology | PPG Institute of Technology 2023 – 2027

CGPA: 7.27

Higher Secondary Certificate (HSC) | Metro Metric Higher Secondary School 2023

Secondary School Certificate (SSC) | Metro Metric Higher Secondary School 2021

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, HTML5, CSS3, Python, React, React Native, Node.js, Express.js

Databases: MongoDB, SQL, Supabase

Tools & Platforms: Git, GitHub, Docker, Vercel, Postman, Playwright, Selenium

Core Competencies: UI/UX Design, REST APIs, Workflow Automation, Agile Collaboration, Problem Solving, Teamwork

WORK EXPERIENCE

Frontend Developer Intern | Attest Technology Solutions Jan 2025 – Apr 2025

- Designed and implemented 3 core modules (quotation management, workflow automation, reporting) for an enterprise software platform, improving process visibility for business teams
- Built interactive dashboards and automation workflows that streamlined internal operations and cut manual reporting effort by an estimated 20–30%
- Developed 2 proof-of-concept solutions presented to stakeholders, accelerating requirement sign-off before production rollout

MERN Stack Developer Intern

| App Innovation and Technology Jun 2024 – Aug 2024

- Built multiple full-stack web applications using React, Node.js, and MongoDB as part of a 4-person development team
- Collaborated with a 4-person team to launch a bakery e-commerce website, implementing user authentication and a production management module used to track daily orders

PROJECTS

ODFE — Cloud-Based SaaS POS Application | React, Supabase, JavaScript

- Developed a role-based Point-of-Sale platform for restaurant operations supporting 4 user roles (Admin, Cashier, Kitchen, Customer)
- Integrated Supabase authentication and database to manage orders, payments, products, tables, and kitchen workflows in real time

Hand2Voice — QA Automation Framework | Selenium, Python

- Built an automation testing framework for an AI chatbot, covering message input, send-button actions, and response validation
- Automated 15+ test scenarios, reducing manual regression testing time by an estimated 40%

RUHI — Voice-Based AI Assistant | LiveKit, Google Realtime API

- Built a real-time voice AI assistant handling 10+ conversational intents using LiveKit and Google's Realtime API, with sub-2-second response latency
